Natural Dead Sea Mineral
RIVAGE was born at the same place where the first civilization emerged at the Dead Sea legendary and mystically rich reservoir of beauty and health elements.

From ancient times, the rich mineral muds and salts of the shores and waters of the Dead Sea have been celebrated for their remarkable effect on the skin. They help clarify, stimulate, nourish and moisturize your skin, resulting in a fresher, healthier and more youthful appearance, lasting forever.

Today, RIVAGE experts have harvested the beneficial elements of the wonderful Dead Sea waters and muds to provide you with a full range of products. Day and night, your skin, hair and body are cared for perfectly by our RIVAGE dead sea products.
The Dead Sea

The Dead Sea lies in the heart of the East at the very birth place of civilization. Legendary and mystical, this small sea nestles in the Jordan Valley at the lowest inhabited point on earth. Serves as a rich reservoir of beauty elements that have been celebrated for their healing and beautifying properties.

From this ancient and holy area, we harvest the treasures salts, mud, minerals and water.

They are scientifically prepared and infused with the richest natural active ingredients and extracts in order to provide you the RIVAGE range of natural skin, bath and body products.
Benefits of The Dead Sea

The Dead Sea is situated at 1,312 feet or 400 meters below sea level, placing it at the lowest point on Earth.

Therefore, the composition of the sea water is very different from any other naturally occurring body of water. The mineral content of the Dead Sea is so high that it doesn’t allow any form of life to dwell within it. It is endowed with numerous water and thermo mineral springs, making it known for its healing effects on various skin diseases such as psoriasis, eczema, and dermatitis.

The high local temperature and low humidity levels, leads to the evaporation of water from the Dead Sea, leaving behind high concentrations of minerals and salts. These salts contain high levels of magnesium, potassium, bromide and natural tar all of which have extremely beneficial and therapeutic effects on the skin.

Furthermore, the Mud from the Dead Sea is harvested and specifically diluted to suit the needs of the skin. This miraculous Mud is nature’s gift to the skin, containing natural formations of minerals that have gradually formed over centuries.
